THE EXTERMINATOR

PelGar news for the pest control industry

Season's Greetings!

The PelGar team would like to wish you and your family a safe and Merry Christmas and a Happy New Year!

The busy PelGar stand at Pest Tech

Andrej Branc, Regional Business Manager Americas, and the Apple Watch winner.

Gerwyn Jones, Asia Pacific Manager

PelGar - Around the world in 30 days!

Back out on the global exhibition trail PelGar kicked off the autumn season with a visit to PestWorld in Boston, USA.

The longest show in the calendar running from the 11th-14th October, the event was the first post pandemic PestWorld without travel restrictions, and it was clear from day one that the attendance numbers and the quality of participation was extremely high. Companies from all over the globe were back and ready to do business and make deals. The conference was held in Boston which is a very busy area of the US for rodenticides, so PelGar's stand was very well visited with interest in our rodenticide formulations from global visitors. As usual, PestWorld was also a forum for what is happening in the pest control industry on a global scale.

PelGar looks forward to seeing all of our great customers from around the world again next year, when PestWorld will be in Honolulu, Hawaii.

Next on the calendar was a quick trip to Milton Keynes in the UK for Pest Tech on the 9th November, a favourite for UK

PCO's. 'It was great to see so many familiar and new faces at the show' comments Nic Blaszkowicz, PelGar's UK & Ireland Business Manager. 'Being a manufacturer and one step back from the end users it's a good opportunity to get some direct feedback both on our products and the industry as a whole. Cimetro is most definitely the product of choice for the majority and the growing range is attracting new users.'

Finishing off the show calendar was FAOPMA in Kyoto Japan, between 6th to the 8th November. There were over 800 delegates in physical attendance, 450 of them were from overseas from 30 different countries. There was also a facility that people could join the presentations virtually throughout the conference and this was well received. FAOPMA stands for the Federation of Asian and Oceania Pest Managers, which comprises of the Associations from 18 different countries from around the region. ■

Product Focus

Cimetrol RFU – 5L

What

Cimetrol Super RFU is a ready for use triple action insecticide now available in a 5L flagon. It contains both a synthetic and natural pyrethroid, in addition to the insect growth regulator pyriproxyfen, for use against flying and crawling insects including ants, fleas, bedbugs, mites, flies, wasps and mosquitos.

Who

For professional pest controllers.

How

To be applied by compression sprayer, Cimetrol RFU requires no dilution and any left over at the end of treatment can be decanted back into the bottle, avoiding wastage completely.

When

When pests are active or when other products have given control failure.

Where

Cimetrol Super RFU has been approved for use on mattresses, soft furnishings and all hard, non-porous surfaces, cracks and crevices. ■
