Pempapel RFU

Insect repellent spray for fabric

Contains:

0.5% w/w permethrin

Permapel RFU is formulated to provide long lasting insect repellence for fabrics against mosquitos, ticks, midges and other biting insects.

The highly effective permethrin formulation has been created to help protect against tropical diseases such as Malaria, Dengue Fever, Zika virus and West Nile virus.

Permapel RFU is suitable for use in all tropical climates on clothing, rucksacks mosquito nets and tents. It is an ideal product for service personnel and for outdoor enthusiasts, whether hiking or caravanning.

Our specially created 'faresol' uses a bag-in-bottle vacuum action to deliver a fine mist that spreads evenly on all surfaces, even when held upside down. Repeated actuation produces a continuous spray enabling quick and easy coverage of large areas.

Why should you use Permapel RFU?

- Long-lasting protection
- Ready for use
- Non-aerosol container for easy transportation
- Suitable for all tropical climates

Packaging

300ml faresol bottle

Technical Information

Insects controlled

Permapel RFU will kill and repel mosquitoes, midges, ticks and other biting insects

Application

Ready to use flaresol spray bottle.

Areas of use

Permapel RFU can be used on uniforms, tents, mosquito nets, rucksacks and camping fabrics as well as general clothing.

Directions for use

Shake well before use. Protect working surface and lay item flat if appropriate. Ensure item is clean and dry. Spray from a distance of approximately 30cm.

Where possible, erect a tent or mosquito net to ensure complete coverage of all surfaces. Whilst this product is suitable to treat waterproof surfaces of a tent, it is advisable to check compatibility on a small area prior to complete treatment. Inner tents or internal compartments can be sprayed as normal.

One 300ml bottle will cover 2 military uniforms, or one uniform twice.

It is also possible to dip fabric into the product. To do this, dispense 50ml of Permapel RFU per square metre of fabric into a bucket and dip the fabric for at least 3 minutes. After this, the items should be air dried, allowing at least 2 hours for drying, before packing away.

This product is registered for NATO use:
NSN 6840-88-670-1469

READ THE LABEL BEFORE USE
