PELGAR INTERNATIONAL

GLOBAL - SUBJECT TO REGIONAL AVAILABILITY

Highest quality products, made in the UK

The PelGar rodent and insect monitor stations are all produced in the UK in a state of the art production facility. This process means that boxes can be produced to requirement, without having

to rely on overseas suppliers and the transportation involved, thus reducing our carbon footprint. The plastic used to create the black rodent and insect stations is all recycled and recyclable.

Where does the plastic come from?

The plastic used to create our rodent stations is derived from the motor industry that would normally be heading for land-fill, instead it is re-processed, re-ground and moulded into the boxes you see before you today.

The PelGar Station begins and finishes life in an environmentally friendly way, it's made from recycled plastic and is also fully recyclable in normal household waste.

Personalised Rodent Stations

With some very reasonable minimum order quantities we are able to fully customise all of our bait station range with your company logo, contact details and rodenticide content.

PelGar International has full in-house design capabilities and can help you personalise your rodent and insect stations.

VANGUARD RAT STATION

Dimensions:

(h) 130mm x (w) 330mm x (d) 230mm

The Vanguard Rat Bait Station is the ultimate strength rat trap and bait station and has been designed to offer unrivalled strength and durability.

- Secure, tamper resistant locking system
- Lock-in holder for rat trap.
- 2 Large compartments for grain bait, no need for trays.
- Complete with rod for block and pasta baits.
- Removable tunnelled entrances for rapid rodent acceptance.
- Clear line of sight.

This unique station is constructed in the UK from highly durable 3mm thick plastic offering unrivalled strength when compared to other plastic stations on the market.

The internal design of this station allows it to be used with all bait formulations with large compartments for loose bait, eliminating the need for trays and comes complete with rods for block and pasta baits. Utilising rodent behaviour knowledge, the Vanguard has been fitted with removable tunnels on each entrance to improve rodent acceptance.

Dimensions:

(h) 101mm (w) 262mm (d) 166mm

BANDIT RAT STATION

The Bandit Rat Bait Box, the ultimate compact rat trap & bait station. Its compact size doesn't mean compromises on strength, making it ideal for discreet outdoor locations as well as internal use.

- Secure, tamper resistant locking system.
- Lock-in holder for rat trap.
- Large compartment for grain bait, no need for trays.
- Complete with rod for block and pasta baits.
- Raised internal height allowing rodents to sit up and feed.

The Bandit rat box is a compact rat trap & bait station. Utilising decades of rodent behaviour knowledge, the Bandit rat box has a raised internal height above the baiting area to allow rodents to sit up and feed encouraging better bait take. Its discreet and yet robust design makes it ideal for external use whilst also being perfect for use internally. The secure locking system prevents unauthorised access. The unique internal design allows this station to accommodate all bait types including liquid baits with compartment for grain bait & rod for block & pasta bait

Dimensions:
(w) 260mm x (h) 120mm x (d) 190mm

PELGAR RAT STATION

The PelGar Rat Station is an industry standard, versatile rat box, with discreet and robust design this box is suitable for both internal and external use.

- Secure, tamper resistant locking system.
- Secure lockable side opening lid.
- 2 Large compartments for grain bait, no need for trays.
- Complete with rod for block and pasta baits.
- Holder for rat traps.
- Clear line of sight.

The high quality, UK made, PelGar Rat Box has become an industry standard bait station. It is a good all-rounder, balancing durability, versatility and price. The discreet and low-profile design makes it ideal for use in internal & external situations and the secure locking system prevents unauthorised access to the station. This station is also capable of holding a rat trap. The PelGar Rat Box can be securely fixed to walls by using the wall fixing bracket. The PelGar Rat Box can accommodate all bait types including, loose, block, pasta & liquid baits.

Dimensions:
(h)110mm x (w) 99mm x (d) 225mm

SOLO RAT STATION

The Solo Rat station is a compact and versatile bait and trap station. This box is ideal for use in locations where space is limited.

- Tamper resistant locking system.
- Unique grill allows light and air flow in to improve rodent acceptance.
- Secure lock-in holder for rat snap traps.
- Suitable for indoor or outdoor use.
- Can be mounted vertically.
- Clear line of sight.

The Solo Rat Station. This ultra compact trap and bait station is the ideal box for locations where space is limited or discretion is required and is ideal for use in warehouse locations such as, between pallets. The PelGar Solo box has a unique lock-in rat trap holder that can be used with all standard rat traps as well as other popular trap systems. This station features a grill at the back of the box that allows in light and airflow to improve rodent acceptance. This unique box can also be mounted vertically and along railings.

Dimensions:
(w) 466mm x (h) 110mm x (d)115mm

RAT TUNNEL

This versatile rat tunnel is discreet, durable and highly effective trap and bait station with a clear line of sight through the station to encourage rodent acceptance.

- Tamper resistant locking system.
- Holds 2 rat traps back to back.
- Secure lock-in holders for rat trap.
- Can also be used as a bait station.
- Complete with 2 rods for block and pasta baits.
- Strong & durable construction.

This highly effective and robust design accommodates 2 rat traps back-to-back, providing a clear line of sight helping to encourage rapid rodent acceptance. The lock-in trap holders ensure that once installed, traps stay secure allowing each trap to be activated independently.

The PelGar Rat Tunnel is also a highly effective bait station, complete with 2 rods to securely hold block and pasta baits in place.

Dimensions:

(w) 466mm x (h) 110mm x (d)115mm

ALERT RAT TUNNEL

The unique and versatile Alert Rat Trap Station features 'alert flags' which get raised when a trap is set off, signifying a catch or an accidental trigger.

- Tamper resistant locking system.
- Holds 2 rat traps back to back.
- Secure lock-in holders for rat trap.
- Can also be used as a bait station.
- Complete with 2 rods for block and pasta baits.
- Strong & durable construction.

With the Alert rat trap and bait station, a quick glance is all you need to see if your traps have caught. Save up to 70% time on your site visits and only check trap boxes that have activity. The unique 'alert-flag' system shows at a glance, if a trap has been activated or not without having to open the box.

This unique and robust dual rat trap and bait station, holds 2 rat traps back-to-back, and provides a clear line of sight helps to encourage rapid rodent acceptance. The lock-in trap holders ensure that once installed, traps stay secure allowing each trap to be activated independently.

The Alert station is also a highly effective bait station, complete with 2 rods to securely hold block and pasta baits in place.

Dimensions:
(h) 37mm x (w) 132mm x (d) 78mm

NG MOUSE BAIT STATION

NG Mouse Bait Station is the 'Next Generation' of mouse bait stations and has been designed to be the most versatile box on the market, utilising decades of mouse control experience.

- Secure, tamper resistant locking system.
- Spike to hold baits securely in place.
- Robust construction.
- Unique design prevents fingers from touching bait through entrance holes.
- Clear line of sight.

The NG Mouse Bait Station is designed to accommodate all of the popular bait formulations with a bait spike to hold Pasta Sachets & Blocks baits securely in place. The unique design of this station prevents fingers from being able to touch bait through the entrance holes and the robust tamper resistant construction it is safe to use around children and pets.

This unique station is compatible with the PelGar Insect Monitors. Simply clip insect monitors on to the base of the NG Mouse Bait Stations.

Dimensions:

(h) 62mm x (w) 140mm x (d) 115mm

SNAP

MOUSE STATION

The Snap Mouse station is a discreet and highly effective trapping station. An ideal solution for non-toxic pest control. For use with mouse traps.

- Tamper resistant locking system.
- Holds a single mouse trap.
- Secure lock-in holders for trap.
- Can also be used as a bait station.
- Option to set trap from the outside with pull cord.
- Strong & durable construction.

The PelGar Mouse Snap Station is a compact and discreet mouse trapping unit, designed to provide an ideal solution for non-toxic pest control. The robust and tamper resistant design does not allow unauthorised access.

The unique internal design of this box, prevents fingers being able to touch the trap from the entrance holes it makes it safe to use around children and pets. This station can accommodate both snap traps and bait at the same time and is tamper resistant due to the secure locking system opened with common universal key.

RANGER MOUSE STATION

Dimensions:

(h) 68mm x (w) 301mm x (d) 118mm

The PelGar Ranger Mouse Station has been designed by professional pest controllers to offer the perfect environment for mice to be trapped or baited.

- Secure dual lockable, tamper resistant lid.
- Accommodates two mouse snap traps.
- Spikes allow for use of block and pasta baits.
- Specific compartments for grain bait.
- Slope leading to trap, eliminating the possibility of mice going underneath the trap treadle.
- Designed to offer mice a straight run through/line of sight.

INSECT MONITOR STATION

PelGar insect monitoring stations are high quality, slimline, plastic monitor stations for use against crawling insects. For use with sticky monitoring pads.

- Clips to the base of the NG mouse box
- Retaining pips to hold pads in place
- Available in 5 colours
- No key required, simply click to open & close
- Discreet design with low profile edges

Dimensions:

(h) 16mm x (w) 125mm x (d) 85mm

The PelGar Insect Monitor has been designed to offer discreet yet effective monitoring of crawling insects, the perfect solution to monitoring infestations levels. This monitor can be attached neatly and discreetly underneath the NG Mouse Box or can be used on its own.

This versatile station is suitable for use with most industry-standard sticky pads and is compatible with metal detachable pads, designed for use in the food industry. Unique design features retaining pips to hold pads in place.

RAT & MOUSE TRAPS

For the effective trapping of rats and mice PelGar has a wide range of different traps to suit a variety of different applications.

- High power rat and mouse traps with increased kinetic energy in the powerful spring.
- Can be supplied in either the traditional bar snap trap or with teeth.
- Will fit into the majority of rodent stations that PelGar supplies.
- Cost effective and an essential addition to your pest control toolbox.

The PelGar range of traps have been used extensively in the field for many years not only by pest control professionals but also Governments and Conservation Groups.

The traps compliment the rodent lure products that are on offer from PelGar.

There are going to be situations where you may need to use glue traps to control a rodent infestation. PelGar can offer you the support and guidance in choosing the right product needed for the job.

Dimensions:

Mouse

(h) 8mm x (w) 230mm x (l) 150mm

Rat

(h) 8mm x (w) 215mm x (l) 327mm

RAT & MOUSE GLUE TRAPS

The PelGar Glue Traps are a highly effective solution for out of control mice or rat infestations. They are extremely versatile and can be folded into numerous shapes, including tubes to look like rodent tunnels.

The glue traps use high-tack glue, thereby minimising the risk of escape once caught, and are able to capture multiple rodents at once to get rid of the infestation efficiently.

These glue traps are supplied folded, which means any traps you don't use will be kept clean and fresh should you need them again.

The straightforward design makes rodent control simple. Just place a glue board along a run or runs with high levels of activity, ensuring pets are unable to access them and check twice a day for rodents. Once rodents are captured, dispose of them humanely before disposing of the glue traps or covering them appropriately.

ROBAN GOLD ALLURE RODENT BOX & TRAP SPRAY

Over the past few years there has been significant development in sprays that reduces the neophobia of rodents entering into new bait boxes or traps.

PelGar has taken its expertise in producing rodenticides and crafted a range of non-toxic trap and box sprays.

- Roban Gold Allure Rodent Box & Trap Spray improve the acceptance of rodent traps and boxes by removing the plastic scent and replacing it with a smell that's attractive to rodents.
- Reduces the time taken for rodent control methods to take effect by avoiding triggering neophobia.
- Available in 4 high scents - Vanilla, Peanut, Strawberry & Amaretto.
- Each bottle contains roughly 500 sprays for long-lasting control.
- Available in 100ml bottles.

Field studies have shown that when older bait stations or traps are replaced with new units there can be a decline in rodent acceptance into the new station or onto the new trap. This is in part attributed to the “new” plastic smell that the rodent is unfamiliar with.

The use of the Re-Scent products from PelGar will help overcome this neophobic behaviour of the rodents and help you gain control more quickly.

ROBAN GOLD ENTRAP

NON-TOXIC GEL FOR USE IN RODENT BOXES & TRAPS

PelGar is widely known for being a developer and manufacturer of highly palatable rodent baits for over 30 years.

Our team have taken this experience and knowledge and developed a unique range of non-toxic gel in a variety of different flavours.

This is packaged in an outer that contains all four flavours which means that whatever the situation and whatever the rodent, you will have the right tool for the job.

PelGar's Roban Gold Entrap are ready-to-use, non-toxic baits used for enticing rats and mice towards traps and boxes.

Our range of attractants have been specially formulated to meet the unique behavioural characteristics of rats and avoid triggering their neophobia.

Rat and mice attractants are the ideal way to reduce the time it takes for effective rodent control.

These attractants are suitable for use with Snap Traps, Glue Boards, Multi-Catch Traps, and Cage Traps to cover all bases. The 35g tubes comes with it's own plunger and cap but can be used in all good gel guns for ease of application.

Featuring
**PEANUT BUTTER
WITH CHOCOLATE**

Our new monitoring tab features some interesting scent-driven technology that creates a unique concentrated zone of specific scent molecules that slowly diffuse outward to simplify rodent monitoring.

The monitoring tab is non-food based and therefore does not mould.

ROBAN GOLD *AIRZONIX*

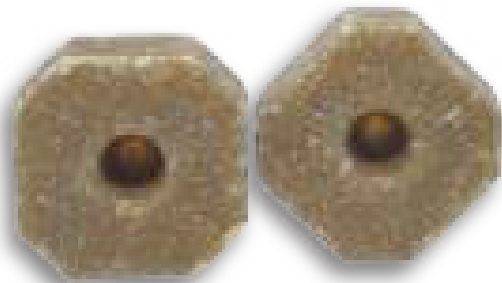

- Non-food-based, allergen-free formulation for use in residential and commercial settings, including the food industry.
- Tried and tested proven scent which is peanut butter with chocolate, with more to come.
- Highly targeted application for precise rodent monitoring.
- Universal cap design for use with most rat snap traps
- Non-toxic to people and animals.
- Available in packs of 36.

ROBAN GOLD MONITOR BLOCKS

- Ready-for-use monitoring bait
- Contains no active and formulated with the same matrix as PelGar's palatable rodenticide blocks.
- Ideal for use in areas where you need to monitor for rodent activity before introducing a rodenticide to gain control.
- Roban Gold contains bio-stats that inhibit the growth of fungi and bacteria.
- Can be used to lure rodents into kill / cage traps.
- Non-toxic to people and animals.
- Packs sizes from 1kg to 10kg.

During the course of your everyday servicing for cockroaches and ants you will no doubt use a gel gun for precise control of the bait that you are applying.

The same concept applies for the application of the new soft monitoring paste from PelGar.

PelGar has a range of different gel guns it can supply you.

GEL BAIT GUN

The **Standard Gel Gun** is an affordable high-quality Gel Bait Gun for the application of a wide range of syringe-style insect baits and rodent monitoring paste. It is easy-to-use with a robust design. It is a lightweight alternative to the traditional metal gel bait guns.

The **Pro Gel Gun** takes gel and bait application to the next level. The unique loading feature allows for the quick replenishment of tubes.

The trigger mechanism is ergonomically designed and is comfortable to use with a high-range of micro-dosing.

For over 10 years PelGar has been involved in the development and design of fly controls units that is supplied to major customers around the globe.

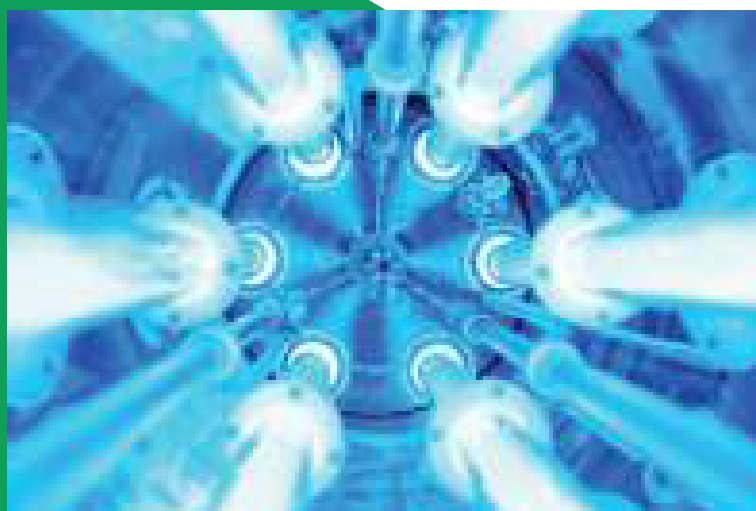

Due to our innovative approach to fly control we can offer an extensive range based on your budget and client needs.

FLY CONTROL UNITS

PelGar's direct relationship with the manufacturer of UV fly units ensures that the full spectrum of units are available to our customers.

From the traditional fly zappers that blows the insect into tiny particles through to glue board units which are now the norm in our industry due to hygiene and audit requirements from your customers.

In the coming years we will see a restriction on the use of the traditional UV tube fly control units that we have used for decades. PelGar has developed a range of new LED UV units that will be compliant with such regulations coming into force in Europe.

Talk to us about your fly control needs and we can advise on the best solution. In addition PelGar can also supply you with glue boards and UV tubes to service your existing fly control units.

PelGar International is committed to providing you with the right solution to your problem. Please contact us for more detailed product information and availability.

Our product range and regulatory approvals are continually evolving. Availability varies by country, depending on local regulations and registration status. For detailed information on which products are registered and permitted for use in your region, we recommend contacting your local PelGar representative.
