INSECTICIDES & RODENTICIDES

PELGAR INTERNATIONAL

USA

International

PelGar International is the leading British manufacturer of highly effective pest control products for professional and agricultural use around the world.

PelGar is not just another bait company. We offer innovative products, novel formulations and ever expanding ideas to the professional pest control operator.

PelGar's active and dynamic research and development program draws on a wide range of market intelligence and technical feedback. This has enabled us to launch further products in the US market to meet the specific needs of pest management professionals (PMPs) on the ground.

Based on our in-depth and detailed knowledge of rodent behavior and biology, our analytical and formulation laboratory ensures the highest product quality from two UK manufacturing sites. We know that baits are not just about what they contain, but that their effectiveness also lies in how and where they will be used.

PelGar produces a range of high quality, palatable rodenticide formulations for the US based on the active ingredients difenacoum and bromadiolone; the most widely used anticoagulants in rodenticides. All anticoagulants, following accidental or secondary poisoning, can be antidoted with Vitamin K1.

Anticoagulants work by reducing the ability of the rodent's blood to clot and each active has a different level of toxicity to mice and rats, as shown in the table below:

Anticoagulant	LD50 mg ai/kg Mouse/Rat	Bait Concentration (PPM)	LD50 (g of bait) Mouse/Rat*	LD50 (g of bait/kg) Dog
Difenacoum	0.8 / 1.80	50	0.4 / 9.0	1000
Bromadiolone	1.75 / 1.13	50	0.9 / 5.6	200

*Typical 250g rat and 25g mouse, consumption based on 25g/3g respectively. LD50 data taken from a variety of industry sources.

An integrated rodent control program is recommended to ensure the correct use and placement of the bait, which will greatly enhance the effectiveness of the control and minimize the risk of poisoning non-target animals including pets, farm animals, wild animals and birds.

Part of this program is ensuring restricted ingress through exclusion methods, which led to the development of our unique, non-toxic Roban Barrier compound to help PMPs easily plug awkward cracks and gaps.

Bait stations must be used and are one of the easiest ways to keep bait secure, fresh and dry and provide a convenient and simple way to place, check and top off rodenticide baits.

Where bait use is sensitive, we also supply powerful snap traps for effective and humane removal of rodents. So whatever situation you are dealing with, PelGar has the products on which you can rely.

Monark Soft Bait

Active:
difenacoum

Availability:
**0.5oz (15g) sachets sold
in 16lb pails.**

Monark SB is the first difenacoum soft bait in America.

Difenacoum is a second generation anticoagulant with a lower toxicity profile than bromadiolone, making it less harmful in the environment and thereby significantly reducing the risk of secondary toxicity to non-target animals and birds.

Monark soft bait is formulated using a blend of high-quality culinary grade wheat flour, chopped grain and soft lard to produce a palatable bait. The synthetic flavoring is attractive to both rats and mice and, because it doesn't contain any allergens, it can be used in sensitive areas such as food processing and factories where products containing nuts would not be authorized for use. Soft baits remain pliable even in freezing temperatures and are easily secured inside a bait station.

Brigand Soft Bait

Active:
bromadiolone

Availability:
**0.35oz (10g) sachets sold
in 16lb pails.**

Brigand SB is our ready-to-use soft bait formulation using bromadiolone, which requires less than one third of a rodent's daily consumption to ingest a lethal dose.

Brigand Soft Bait is made using the highest quality ingredients including food grade wheat flour, chopped grain, soft lard and synthetic peanut flavoring to produce a highly palatable rodenticide. The synthetic peanut flavoring enhances the attractiveness of the bait to the target rodent, while eliminating nut contamination and allergen risks. Taste adjuvants and flavors help to improve bait take and stabilising agents prevent oxidation. Brigand Soft Bait provides effective control of rats and house mice; its high fat makes it the preferred formulation in cold situations, or where rodents have declined to accept other baits.

Brigand Wax Blocks

Available in the following actives:
bromadiolone

Availability:
1oz blocks sold in 18lb pails.

Wax block baits are ideal for use in situations where bait security is paramount or where baits are used in damp and humid environments.

The result of extensive research by PelGar, our hot-cast wax blocks are formulated using high-quality culinary grade wheat flour blended with chopped wheat, other cereals and proteins to ensure excellent bait take. Using edible waxes, the hot casting process gives the blocks considerably more protection from the elements when compared to extruded blocks. Our cast wax blocks have a central hole for threading onto spikes or bars so they can be easily secured in place in a bait station.

Roban Barrier Non Toxic Paste

Contains:

Non toxic paste containing EPS beads and metal fibers.

Contains no pesticides or biocides.

Application:

Ready for use application with a caulking gun.

Availability:

**340g caulking tube
Box of 12 tubes.**

Roban Barrier (formerly RodentStop) is an innovative physical barrier formulation that seals cracks, seams, holes, gnawed openings and other open areas to prevent entry from rodents and other pests.

Using a caulking gun, it is quick and easy to apply onto many surfaces including PVC, is instantly waterproof, paintable when dry and unaffected by extreme temperatures to provide long lasting protection. The versatility and flexibility of Roban Barrier make it ideal for use in a wide range of locations both internally and externally. It can be effectively incorporated into both new and existing buildings and is particularly well suited to hygiene-sensitive areas, such as food manufacturing and preparation facilities, or around plumbing and electrical cables.

VANGUARD HEAVY Station

The Ultimate Rat Bait Station

The Vanguard Heavy is much more than just another box, it is the result of decades of practical field experience, utilizing industry professional's experience and the very latest in design technology and materials. Both the base and station are made from 100% recycled materials.

For Use With:
Snap-traps, baits and monitoring blocks.

Availability:
Packed loose at 108 stations per pallet.

New and unique dense rubber base made from recycled tire material for weight, stability and grip on multiple surfaces.

Dimensions (Station):
(h) 130mm x (w) 320mm x (d) 230mm
Dimension with base:
(h) 165mm x (w) 385mm x (d) 260mm

- 1 Easy to open with secure lock.
- 2 Holds the PelTrap break neck rat trap.
- 3 Base held to station securely with wing nuts and hex bolts.
- 4 Complete with horizontal or vertical rods for bait placement.
- 5 Removeable tunnelled entrances for rapid rodent acceptance.
- 6 Sits flush to the wall and opens from the side for easy access.

Dimensions:
(h) 110mm x (w) 466mm x (d) 115mm

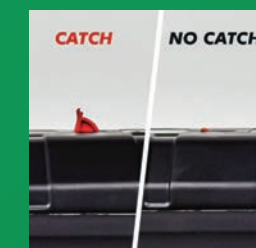

ALERT Bait Station

Professional, discreet and highly effective unit

The PelGar Alert Station has been designed with the help of PMPs to offer the perfect environment for rodents to be trapped and baited with an easy mechanism for checking the results of placed snap traps.

For Use With:
Snap-traps, baits and monitoring blocks.

Availability:
Box of 6 stations with accessories.

The PelGar Alert Station has been designed to provide a superior catch rate over other trap systems on the market.

- 1 Secure and lockable tamper-resistant lid.
- 2 Accommodates two rat snap traps.
- 3 Rods allow for use of block and soft baits.
- 4 Flags alert you if the trap inside has been set off.
- 5 Traps easily secured in place on front edge with insert clip.
- 6 Designed to offer rodents a straight run-through/line of sight.

BANDIT Bait Station

Strong, deadly and compact

This new and exclusive box has been designed with the help of PMPs to offer the perfect environment for rats to be trapped in and feed.

For Use With:
Snap-traps, baits and monitoring blocks.

Availability:
Box of 6 stations with accessories.

The Bandit offers strength and durability at a competitive price.

Dimensions:
(h) 105mm x (w) 262mm x (d) 166mm

- 1 Clear line of sight.
- 2 Unique lock-in rat trap holder.
- 3 Complete with spike for block and soft baits, and divider for whole wheat or pellet baits.
- 4 Water drainage holes to prevent bait from getting wet.
- 5 Ability to also hold snap traps.
- 6 Raised internal height to allow rats to sit up and feed.

PELTRAP NZ Rat & Mouse Snap Traps

Functionality at a competitive price

Both the rat and mouse PelTrap NZ are easy to use and secure, and will fit in most stations. They have a strong spring meant to break the neck so the rats and mice do not suffocate but are killed instantly.

For Use With:
Bait stations, individually or with monitoring blocks or lures

Availability:
NZ Rat - Box of 12 snap traps
NZ Mouse - Box of 24 snap traps

- 1 A compact version of its big brother, the PelTrap NZ Mouse is easy to use and secure, and will fit in most mouse stations. It has a strong spring meant to break the neck so the mouse does not suffocate but is killed instantly.
- 2 The PelTrap NZ Rat with an 8 coil spring, strong enough to break fingers! It is stronger than most snap traps on the market, for a quick and efficient kill.

Dimensions:
(h) 62mm x (w) 140mm x (d) 115mm

SNAP BOX Mouse Station

The next generation for non toxic pest control

The PelGar Snap Box has been designed in response to the increasing demand for non toxic Pest Control.

It offers the perfect solution to protecting and hiding snap-trap and glue board options.

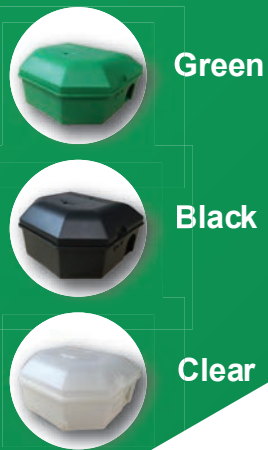

For Use With:

Snap traps, glue boards, baits and monitoring gels.

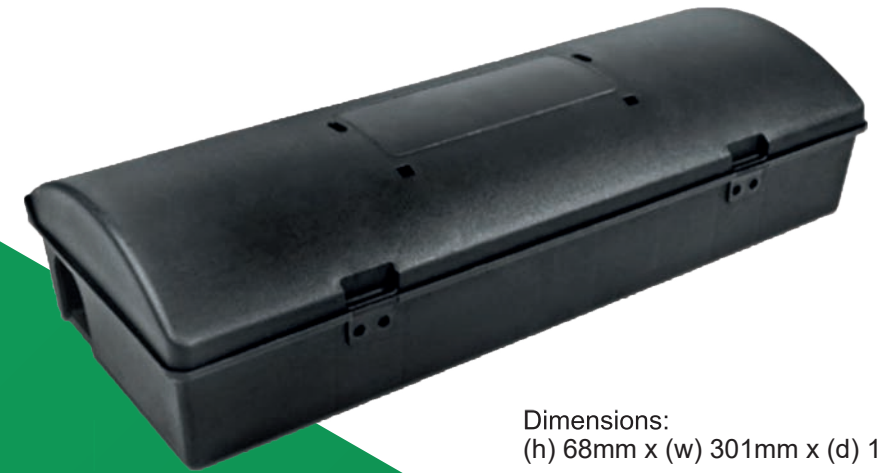

Availability:

Box of 12 stations.

Available in three colors:

- 1 Uses the same key as all PelGar stations .
- 2 Accommodates snap traps and bait at the same time.
- 3 Option to set trap from the outside with a pull cord.
- 4 Visible inspection slot allowing user to inspect the trap quickly.

Dimensions:
(h) 68mm x (w) 301mm x (d) 118mm

RANGER Mouse Tunnel

Professional, discreet and highly effective unit

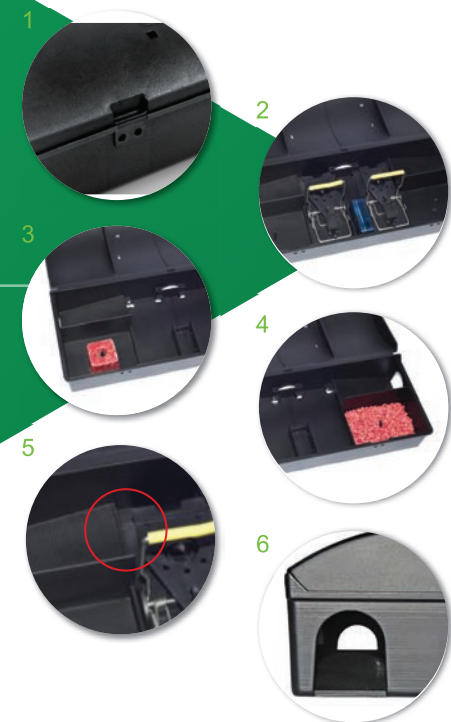

The PelGar Ranger has been designed by professional pest controllers to offer the perfect environment for mice to be trapped and baited. The Ranger is designed to provide a superior catch rate over other trap systems on the market.

For Use With:

Snap traps, glue boards, baits and monitoring blocks.

Availability:

Box of 12 stations with accessories.

- 1 Secure dual lockable, tamper resistant lid .
- 2 Accommodates two mouse snap traps.
- 3 Spikes allow for use of block and soft baits.
- 4 Specific compartments for grain bait.
- 5 Slope leading to trap, eliminating the possibility of mice going underneath the trap treadle.
- 6 Designed to offer mice a straight run-through/line of sight.

Dimensions:
(h) 37mm x (w) 132mm x (d) 78mm

NG MOUSE Bait Station

Compact, discreet, yet effective.

The PelGar NG Mouse Box is a versatile box proving to be the mouse station of choice for PMPs across the globe. The PelGar NG mouse box has been designed with the operator in mind.

For Use With:
Baits and monitoring blocks.

Availability:
Box of 12 stations with accessories.

Available in 4 additional colors by special order:

-  Green
-  Red
-  Blue
-  White

- 1 Uses the same key as other popular boxes on the market.
- 2 Accommodates many popular bait formulations.
- 3 Unique design prevents fingers from touching bait through entrance holes.
- 4 Fixing bracket available.
- 5 Combinable with the Eradisect insect monitoring station.

Dimensions:
(h) 16mm x (w) 125mm x (d) 85mm

ERADISECT Insect Monitor

Discreet solution to insect monitoring

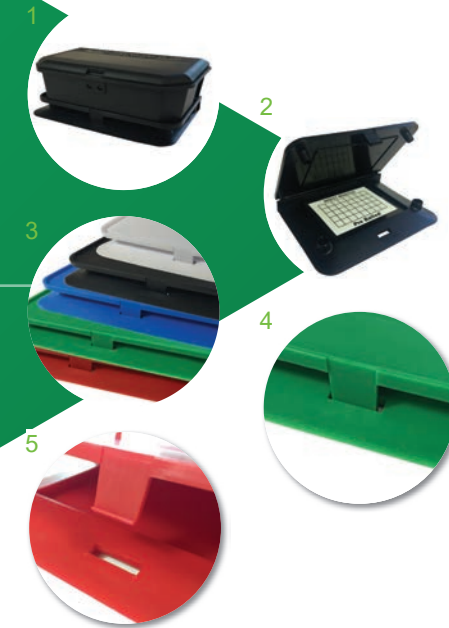

A slimline plastic monitor for crawling insects, the perfect solution for monitoring infestations. Can be combined with the NG Mouse station for dual purpose baiting.

For Use With:
NG Mouse station, lures and attractants.

Availability:
Box of 12 stations complete with glue boards.

The Eradisect Insect Monitor has been designed to offer discreet yet effective monitoring of insects.

- 1 Can be attached to the Rotech NG mouse box or used on its own.
- 2 Holds industry standard sticky pads.
- 3 Available in 5 different colors by special order.
- 4 Low profile enables even the smallest of pests to enter the trap.
- 5 No key needed to open, simply click to close.

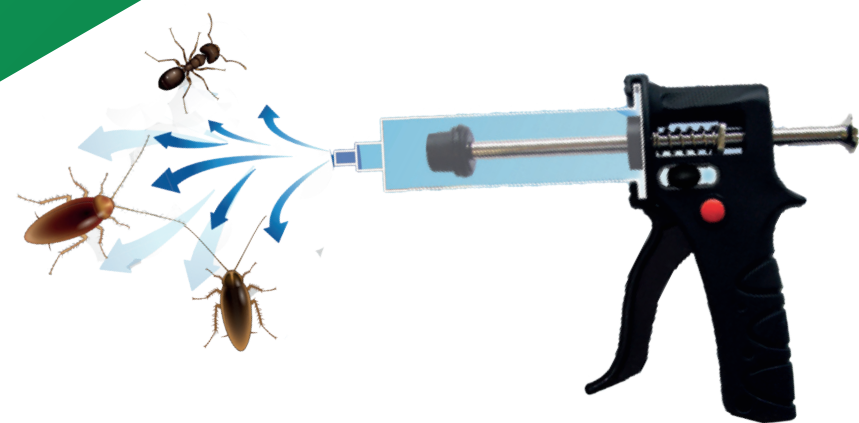

PELGAR BLACK BAIT GUN

Precise application control of baits and pastes

The PelGar Black Bait Gun is an affordable high-quality Gel Bait Gun for the application of a wide range of syringe-style insect baits and rodent monitoring paste. It is easy-to-use with a robust design. It is a lightweight alternative to the traditional metal bait gun, this Gel Bait Gun is a necessary tool for anyone conducting professional insect control treatments for pests like cockroaches and ants as well as the placement of rodent monitoring pastes and lures.

For Use With:
Insect control treatments, monitoring paste, lures and attractants.

Availability:
1 Pistol applicator per box.

Dimensions:
(h) 180mm x (w) 140mm
Weight:
158 grams (5.65 oz)

ROBAN GOLD ENTRAP

Non-toxic gel for use in traps, stations and glue boards

PelGar's Roban Gold Entrap are ready-to-use, non-toxic monitoring gels used for enticing rats and mice towards snap traps and rodent stations. Our range of flavors have been specially formulated to meet the unique behavioural characteristics of rats and avoid triggering their neophobia while remaining enticing to mice as well.

For Use With:
All snap traps, glue boards, multi-catch traps and placed stations.

Availability:
Mixed or single flavor options

The 35g tubes comes with it's own plunger and cap but can be used in all good gel guns for ease of application.

- Available Flavors:
-  Vanilla
 -  Apple
 -  Amaretto
 -  Peanut Butter

ROBAN BLOCKER

Roban Blocker is a good rodent and pest barrier designed to provide protection for your premises. Made from coarse stainless steel interwoven with durable synthetic fibers, it forms a highly effective physical barrier to keep pests out.

With its spongy texture, Roban Blocker easily fits snugly into cracks, crevices, and gaps, offering flexibility and ease of use during installation.

Application:

Filling of holes, gaps and seams for rodent exclusion

Availability:

10 foot by 4 inch roll

Roll Dimensions:
(l) 10 ft x (w) 4 inches

ROBAN FOAM BUNDLE

The Roban Foam Bundle Set is an innovative solution designed to protect your home and property from pests and rodents. It includes two Copper Mesh packs of 2m (6ft) each, providing pest-proofing and rodent-blocking capabilities. Whether you're dealing with insects, rats, or mice, the Roban Foam Bundle Set offers a strong and durable barrier to keep unwanted pests out. Made for larger voids and openings, the foam is not super expanding, is a neutral color and cures slowly for a denser consistency and stronger adhesion.

For Use With:

For filling holes, gaps and voids to prevent rodent entry.

Availability:

500ml can with 2 x 2m (6ft) Copper Mesh packs

Can size:
500 ml

ROBAN GUARD

The Roban Guard proofing products are developed using the flexible and durable rubber material Santoprene™. Along the length of the Roban Guard are 1mm inlaid acid-resistant stainless-steel wires, which makes the seals impossible for rodents to gnaw through. The bottom of the Roban Guard acts as an insect barrier and close fit setter for uneven terrain, allowing for use on multiple surfaces while keeping out unwanted pests. Roban Guard has a waved/corrugated surface which prevents the inlaid steel wires from sliding and is a versatile product which can be used to solve most pest proofing tasks.

For Use With:

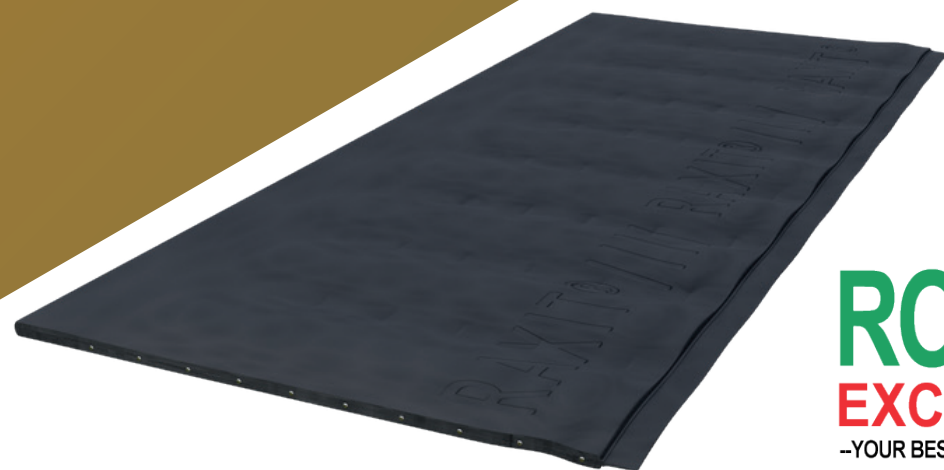

Rodent and Insect barrier for doors, gaps and industrial spaces

Availability:

36 feet per box

Roll Dimensions:
(l) 36 ft x (w) 3 inches

ROBAN GUARD 10ft Kits

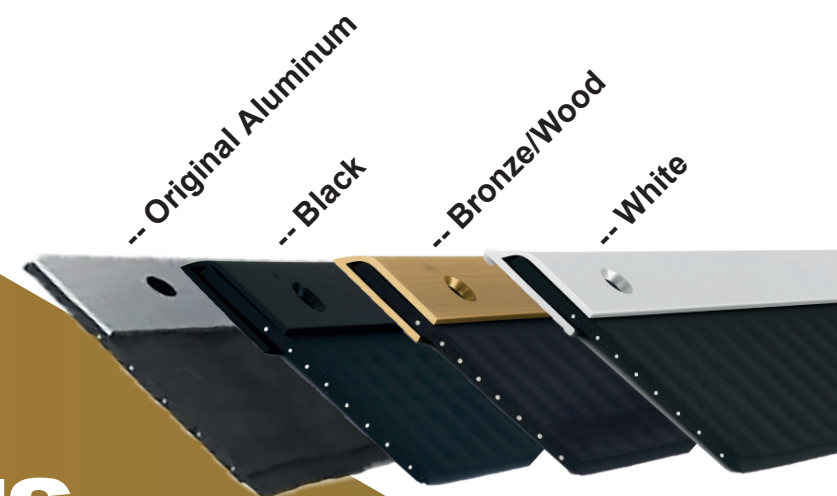

The Roban Guard proofing products are developed using the flexible and durable rubber material Santoprene™. Along the length of the Roban Guard are 1mm inlaid acid-resistant stainless-steel wires, which makes the seals impossible for rodents to gnaw through. The bottom of the Roban Guard acts as an insect barrier and close fit setter for uneven terrain, allowing for use on multiple surfaces while keeping out unwanted pests. All Roban Guard products have a waved/corrugated surface which prevents the inlaid steelwires from sliding. Roban Guard kits can be modified with additional flashing options in White, Black and Broze/Wood colors.

For Use With:

Rodent and Insect barrier for standard doors and garages

Availability:

**10ft Roban Guard per box
3 x 39 inches aluminum flashing
self tapping steel screws
double sided tape**

Roll Dimensions:
(l) 10 ft x (w) 2 3/4 inches

All of our bait stations are Uni-Key compatible
One key opens the entire range of PelGar stations and boxes.

Correct Bait Placement

Bait safety is of paramount importance in any rodent control program. Bait stations are one of the easiest ways to keep bait secure and provide a convenient and simple way to place, check and top off rodenticide baits.

They also help keep bait dry and fresh when used in outdoor or damp locations. Bait stations should be placed to limit access to non-target animals including pets, farm animals, wild animals and birds.

Follow our handy tips so that rats are quicker to accept the bait:

- Get rid of the 'new plastic' smell of bait boxes by rubbing them with soil, leaves or anything else from the environment where you are placing them.
- Look out for signs of grease smears along walls, footprints, droppings and gnawing to place bait boxes on well-used runs where they will be more readily accepted.
- Tidy up and, where practical, move other items so that rats will choose the bait box route rather than go around it.
- Make sure you have enough bait boxes to deal with the problem, ideally one every 15 to 30 feet.
- Tackle large infestations by increasing the number of bait boxes.
- Remove access to their current food source, so they choose the bait.

Where can you get PelGar products?

PelGar USA Products are registered in all 50 states, the District of Columbia, Puerto Rico and the US Virgin Islands. Please contact one of our representatives for further details about where and how to get our products when you need rodent control!
